

**This is the title of the paper.
It should not be more than two lines**

FIRSTNAME MIDDLENAME LASTNAME¹, FIRSTNAME LASTNAME²

Key words: you, should, give, max, six, keywords

Abstract

The abstract should contain a short introduction, the main results, and conclusions. It should be understandable without the rest of the paper. The abstract should not exceed 1000 letters (incl. spaces).

Introduction

In the introduction, present the problem in context of the “state of the art” and the goal of the paper well explained. Give here an outline of the way of reaching the goal. For example: if it is a scientific paper you write the methodology. If you write a vision paper, how you did it. The introduction should not exceed 1000 letters (incl. spaces). References can be done in following way (Lastname 2001, Lastname and Lastname 2002). If a reference has more than three authors, please use following citation: Lastname et al. 2003.

Materials and methods

This section is only necessary if you have a scientific paper. The material and method chapter is very important to be accepted as scientific paper (if you intend to make one). This section is often very weak in conference publications. If the reader cannot clearly understand the way you did your work, the paper will lose reputation. You should explain everything what you did and make it possible for somebody to repeat your work. If you cite parameters, you should explain here. References for parameters are very important or you state them as own design.

Results

This chapter is relevant for all papers. You can use another title of this chapter. If you write more than one page in this chapter, please use sub-chapters to make it readable. **Do not forget that the full paper shall not exceed 4 pages.**

Example text (taken from a paper from a Workshop)

If you use tables, please make it as follows (Table 1):

Table 1: Cotton seed yield and some yield attributes under different cropping systems in 2019 and 2020

Cropping systems	2019				2020			
	NBLS	SCWT (g)	WTS (g)	CY (kg/ha)	NBLS	SCWT (g)	WTS (g)	CY (kg/ha)
Continuous cropping (-OF)	13.6	7.3	5.3	204.96	9.1	8.6	6.3	230.44
Continuous cropping (+OF)	24.3	22.5	16.0	631.95	11.7	19.3	12.1	541.80
Rotation (+OF)	24.4	24.1	18.9	675.08	17.6	25.7	18.1	692.16
Rotation (-OF)	22.3	24.2	19.3	677.88	9.8	28.0	20.1	784.56
Conventional	21.6	11.3	5.7	318.40	13.5	9.7	5.8	272.72
LSD (5%)*	5.60*	4.35**	3.75**	122.048**	2.90**	7.90**	4.06**	207.380**

* significant at P<0.05 and ** significant at P<0.01, NBLS - number of bolls per plant, SCWT - seed cotton weight, WTS – weight of seeds, CY – Cotton yield, OF - Organic fertilizer,

¹ Here you write the contact details: The institution name, country, web-address, eMail address (see example below). (Remarks to the authors names: Please give even full first names, no abbreviations. The first author should have done the most relevant work and is contact person. Please have no authors who have not substantially contributed to the paper.

² Example: Federal University of Agriculture, Abeokuta, Nigeria www.funaab.edu.ng email: xxxxxxxx@funaab.edu.ng

If you use figures, please do it as following example (from the same paper as the table above). The figures shall be in black and white color, as simple as possible to make them easy understandable. The letters should not smaller than the letters in this text. A key should be part of the table and the figures. If you use pictures, please let it be in black and white as well. All tables, pictures and figures have a reference in the text and think about property rights of fotos and data. For units please use international standards: e.g. Kilogramm, Celsius, Hectare. If you use their abbreviation, please make it always with a space to the number: e.g.: 100 %, 19 kg, 5 °C. Species are written in italics e.g. *Urtica dioica* or *S. aureus*.

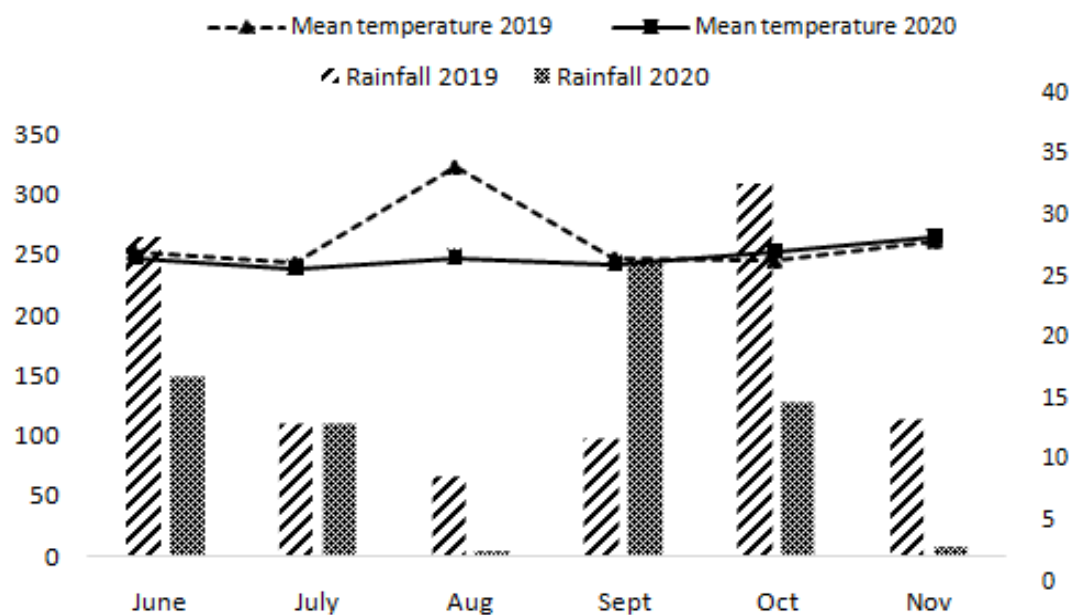

Figure 1: Monthly rainfall distribution and mean temperature (July-November 2019 and 2020)

And so on up to an absolutely maximum of 4 pages. And so on up to a absolutely maximum of 4 pages. And so on up to a absolutely maximum of 4 pages. Less is even better.

Please make pictures as shown (figure 2).

Figure 2. The pictures are black and white, good printable and NOT attached

Discussion

In this section, you write with clear understanding, what the results shall tell the reader from your sector. This chapter should not exceed 1000 letters (incl. spaces). If you are selected for an oral contribution, this will be the main content of your speech.
